	Ministry of National Guards – Health Affairs
	"Business Continuity & Risk Management Drills and Exercise"

COURSE OUTLINE	
COURSE NAME	**"Business Continuity & Risk Management Drills and Exercise"**
WHO WILL ATTEND THIS COURSE	✓ Individuals responsible for overseeing the Business Continuity & Risk Management (BCRM) ensuring the risk compliance management within MNGHA and affiliated facilities, ✓ Individuals tasked with ensuring MNGHA's adherence to relevant regulations, standards, and best practices, including QIYAS and ISO 22301:2019, to safeguard the continuity and quality of health services. ✓ Managers and senior managers responsible for setting and implementing strategic direction within their organizations ✓ Leaders responsible for risk, resilience, business continuity, or crisis management looking to elevate their strategic thinking on resilience to a more advanced level. ✓ Staff involved in planning, responding to, and managing incidents and crises to ensure minimal disruption to MNGHA's critical services. ✓ Professionals providing expert advice on implementing effective BCRM practices tailored to the unique needs of MNGHA. ✓ Managers responsible for critical operations who need to understand the impact of potential disruptions and plan for the continuity of services. ✓ Healthcare professionals and support staff interested in understanding their roles in Risk control and mitigation.
COURSE OBJECTIVES	✓ Planning is half the battle. and **disaster recovery simply means planning for the worst case**. Disaster can strike any company or organization – at any time and without warning. To avoid knee-jerk reactions and panic, disaster recovery defines in advance the steps your company will take in the event of an emergency. ✓ Clearly communicate the benefit of an exercise and evaluation program ✓ Define the terms associated with Business Continuity Plan Exercise and Assessment ✓ Understand Business Continuity Exercise and Assessment concepts ✓ Describe the methodologies used in Business Continuity Plan Exercise and Assessment
LEARNING OUTCOMES	**You will emerge from the program with the understanding and the refreshed capabilities to:** ✓ The purpose of risk management is not to eliminate risk, but to understand it so that you can take advantage of the upside and minimize the downside. This requires clarity on what risks are relevant for your organization and that you have processes in place to prioritize and manage them.. ✓ Ensure that corrective actions are implemented to address incidents and develop annual drill programs to check the roles of the responsible team. ✓ You will learn how to assess the efficacy of your business continuity plans using a blended exercise assessment approach that incorporates proven models.
